

Good. Now we narrow everything down to what actually ships.

This is your **MVP DOCUMENT** — not your dream product.

This is the smallest thing that can:

- Deliver real value
- Get real users
- Generate real revenue
- Be built in 3–5 weeks

Anything not in this doc is cut.

MVP DOCUMENT

(Product Codename: Launchpad)

1 MVP OBJECTIVE

Primary Goal

Allow a student to create and share a clean, professional, resume-first profile page in under 10 minutes.

Success Criteria

Within 30 days of launch:

- 50+ active student profiles
- 10+ Pro upgrades
- 70% of users publish a live page
- At least 1 internship success testimonial

If this doesn't happen, we revise positioning — not features.

2 MVP VALUE PROPOSITION

“Apply to internships with one clean link.”

That's it.

Not AI.

Not analytics.

Not advanced customization.

3 MVP USER FLOW

Step 1: Sign Up

- Email + password (Supabase auth)
- No OAuth initially (keep simple)

Step 2: Create Profile

Form-based onboarding:

- Full name
- Headline
- University
- Graduation year
- Internship status (dropdown)
- Accent color

Step 3: Upload Resume

- PDF only
- Max 5MB
- Required before publish

Step 4: Add Up To 3 Projects

Fields:

- Title
- 1-line summary
- 3 bullet highlights
- GitHub link (optional)

- Demo link (optional)
- Tech stack tags

Step 5: Add Skills

Simple comma-separated input

Grouped automatically into one section

Step 6: Publish

System generates:

`yourdomain.com/firstname-lastname`

Profile becomes public.

MVP FEATURE SET (STRICT)

Included

Authentication

- Email/password
- Password reset

Profile Editor

- Basic info form
- Save draft
- Publish toggle

Resume Upload

- PDF storage
- Replace functionality
- Download button
- Timestamp auto-update

✓ Projects (Max 3 on Free)

- CRUD operations
- Drag reorder (simple index-based)
- Structured format only

✓ Skills

- Simple tag list
- No categories in V1

✓ Public Profile Page

Sections:

1. Hero
2. Resume
3. Projects
4. Skills
5. Contact

✓ Recruiter View Mode

?view=recruiter

- Simplified layout
- Resume prioritized
- Minimal styling

✓ Free vs Pro Plan

Free:

- 3 projects max
- Branding footer
- No custom domain

Pro:

- Unlimited projects
- Remove branding
- Custom domain

- \$29/year or \$6/month

✓ Stripe Integration

- Checkout
 - Webhook handling
 - Plan upgrade/downgrade
 - Grace period 7 days
-

5 EXCLUDED FROM MVP (IMPORTANT)

- ✗ LinkedIn import
- ✗ GitHub auto-import
- ✗ AI resume rewriting
- ✗ Analytics dashboard
- ✗ Resume parser
- ✗ Drag-and-drop layout
- ✗ Multiple themes
- ✗ Dark/light toggle
- ✗ Social feed
- ✗ Blog
- ✗ Multi-page profiles
- ✗ Public search directory

If you're tempted to add these — don't.

6 MVP TECH ARCHITECTURE

Frontend:

- Next.js (App Router)
- Tailwind
- shadcn/ui components

Backend:

- Supabase (Auth + Postgres + Storage)

Payments:

- Stripe Checkout

Hosting:

- Vercel

All public pages statically generated when published.

DATABASE (MVP VERSION)

users

- id
- email
- plan_type
- created_at

profiles

- id
- user_id
- slug
- name
- headline
- university
- grad_year
- internship_status
- accent_color
- published (boolean)

resumes

- id
- profile_id
- file_url
- updated_at

projects

- id

- profile_id
- title
- summary
- highlights (json array)
- github_url
- demo_url
- order_index

skills

- id
 - profile_id
 - name
-

8 PERFORMANCE REQUIREMENTS

Public page must:

- Load under 1.2 seconds
 - Lighthouse score > 90
 - Be mobile optimized
 - Be SEO indexable
-

9 MVP DESIGN CONSTRAINTS

Only 1 template.

Only 4 accent colors.

No layout customization.

Typography fixed.

Maximum 600px content width for readability.

10 MVP TIMELINE (REALISTIC)

Week 1

- Auth
- DB schema
- Dashboard skeleton
- Profile CRUD

Week 2

- Resume upload
- Projects CRUD
- Public page rendering

Week 3

- Recruiter mode
- Stripe integration
- Free/Pro gating

Week 4

- Polish
- Performance optimization
- Landing page
- Deploy

Launch at end of Week 4.

MVP LANDING PAGE STRUCTURE

Section 1 – Hero

“Apply with one clean link.”

CTA:

Create your page — Free

Section 2 – Problem

- LinkedIn is noisy
- Personal websites are hard
- Resumes are static

Mention LinkedIn once here for comparison.

Section 3 – Demo Screenshot

Section 4 – How It Works

1. Add resume
 2. Add projects
 3. Share link
-

Section 5 – Pricing

Free vs Pro comparison

1 2 MVP METRICS TO TRACK

- Signups
- Profiles published
- Resume uploads
- Pro conversions
- Churn rate

Ignore:

- Vanity traffic
 - Social followers
-

1 3 MVP RISKS

Risk 1:

Students won't pay.

Solution:

Annual student pricing.

Risk 2:

They prefer LinkedIn.

Solution:

Position as complement, not replacement.

Risk 3:

Too similar to generic portfolio builders.

Solution:

Stay resume-first.

1 4 MVP DEFINITION OF DONE

You are done when:

- A student can sign up
- Upload resume
- Add 3 projects
- Publish
- Share link
- Recruiter can download resume
- Stripe payments work

If those work, you launch.

If you want next, I can:

- Create a detailed build task breakdown (like Jira-ready tickets)
- Design the exact onboarding UX flow step-by-step
- Or simulate a recruiter reviewing a profile and critique it brutally

What's the next move?
