

Good. This is how you build seriously.

I'm going to structure this like real startup documentation — clear, decision-driven, and execution-ready.

We'll define your product as:

A resume-first professional profile platform for students applying to internships.

For clarity in these docs, I'll refer to the product as **"Launchpad"** (placeholder name — we can change later).

1 DESIGN DOCUMENT

1.1 Product Philosophy

Core Principles

1. **Opinionated > Customizable**
2. **Structured > Flexible**
3. **Professional > Creative**
4. **Fast > Fancy**
5. **Clarity > Personality**

This is NOT:

- A website builder
- A social profile tool
- A creative portfolio playground

This IS:

- A professional pitch page
 - A recruiter-optimized interface
 - A structured resume enhancement tool
-

1.2 Target User Persona

Primary Persona: “Internship-Focused Engineering Student”

- Age: 18–23
- Applying to internships
- Has 2–5 projects
- Has a resume PDF
- Uses LinkedIn
- Uses GitHub
- Wants to stand out but doesn’t want to design a website

Pain Points:

- Resume feels generic
 - LinkedIn is noisy
 - Personal website is too much work
 - Portfolio scattered across platforms
-

1.3 Information Architecture

Public Profile Page Structure

1. Hero Section
2. Resume Block
3. Projects Section
4. Skills Section
5. Experience Section (optional)
6. Contact Section
7. Footer

No sidebars.

No multi-page navigation.

Single scroll page.

1.4 Layout Specification

1. Hero Section

Fields:

- Full Name (H1, 36–44px)
- Headline (e.g. “Computer Science Student @ X University”)
- Graduation Year
- Location (optional)
- Internship Status Badge:
 - “Seeking Summer 2026 Internship”

CTA Buttons:

- Download Resume
 - Contact
-

2. Resume Block

Features:

- PDF Upload
- Embedded preview
- Download button
- “Last updated” timestamp
- File size optimization

UI:

- Minimal card
 - Light border
 - No heavy shadows
-

3. Projects Section

Each Project Card Includes:

- Title
- 1-line summary
- Tech stack tags
- 2–4 bullet highlights
- Live demo link
- GitHub link
- Optional image

Project Format Enforced:

- Problem
- Solution
- Impact

This structure is mandatory to ensure clarity.

4. Skills Section

Grouped by:

- Languages
- Frameworks
- Tools
- Other

Tags displayed as:

- Rounded pills
- Light background
- Accent border

No proficiency bars (they look amateur).

5. Contact Section

Includes:

- Email (button)
- LinkedIn
- GitHub
- Optional calendar link

No public comment section.

No social feed.

1.5 Design System

Typography

Primary Font:

- Inter

Fallback:

- System sans-serif stack

Font Scale:

- H1: 40px
 - H2: 24px
 - Body: 16px
 - Small: 14px
-

Colors

Base:

- White background
- Light gray sections

Accent options:

- Blue
- Purple
- Emerald
- Black

Only one accent per profile.

Spacing System

Use 8px grid.

Large section padding: 64px top/bottom.

Card padding: 24px.

Whitespace is intentional.

1.6 Mobile Behavior

- Fully responsive

- Stack vertically
 - Sticky resume button on mobile
 - Tap targets $\geq 44\text{px}$
-

1.7 Recruiter Mode

Accessible via:

?view=recruiter

Changes:

- Removes decorative elements
- Simplifies spacing
- Prioritizes:
 - Summary
 - Resume
 - Projects
 - Contact

Loads under 1 second.

ENGINEERING / ARCHITECTURE

DOCUMENT

2.1 Tech Stack

Frontend:

- Next.js (App Router)
- TailwindCSS
- shadcn/ui

Backend:

- Supabase (Postgres + Auth + Storage)

Payments:

- Stripe

Hosting:

- Vercel
-

2.2 System Architecture

High-Level Components

1. Auth Service
 2. Profile Service
 3. Resume Storage
 4. Public Rendering Engine
 5. Payment Gateway
 6. Analytics Module
-

2.3 Database Schema (Simplified)

Users

- id
- email
- created_at
- plan_type

Profiles

- id
- user_id
- slug
- headline
- grad_year
- internship_status
- accent_color

Projects

- id
- profile_id
- title
- summary
- tech_stack(array)
- github_url
- demo_url
- order_index

Skills

- id
 - profile_id
 - category
 - name
-

2.4 Resume Storage

- Stored in Supabase storage
 - Max size: 5MB
 - Versioned uploads
 - Auto timestamp on replace
-

2.5 URL Routing

Public:

`yourdomain.com/[slug]`

Recruiter:

`yourdomain.com/[slug]?view=recruiter`

Dashboard:

`app.yourdomain.com/dashboard`

2.6 Performance Targets

- TTFB < 300ms
- Page load < 1.2s

- Lighthouse > 90
- Static generation for public pages

Use ISR (Incremental Static Regeneration).

2.7 Security

- Row-level security in Supabase
 - Auth middleware for dashboard
 - Rate limiting on public endpoints
 - File scanning for resume uploads
-

2.8 Subscription Logic

Free:

- 1 profile
- 3 projects
- Branding footer

Pro:

- Unlimited projects
- Custom domain
- Remove branding
- Basic analytics

Stripe Webhooks:

- Update plan_type
 - Handle failed payments
 - Grace period: 7 days
-

MARKETING DOCUMENT

3.1 Positioning Statement

For engineering students applying to internships, Launchpad is a resume-first professional page that helps you stand out with one clean link.

Unlike LinkedIn, it's built specifically for applications.

3.2 Core Messaging

Primary Hook:

"Apply with one clean link."

Secondary Hooks:

- "Your resume, but modern."
 - "Stand out at career fairs."
 - "Built for students who build."
-

3.3 Go-To-Market Strategy

Phase 1: Campus Domination

- CS clubs
- Hackathons
- Engineering societies
- Resume workshops

Offer:

Free Pro for first 100 users.

3.4 Growth Loops

Loop 1:

Student shares link → Recruiter views → Recruiter sees branding → New signups.

Loop 2:

Career fair → Students compare → Peer adoption.

Loop 3:

Hackathon integration.

3.5 Content Strategy

Topics:

- How to stand out at career fairs
- Resume mistakes engineers make
- Portfolio tips
- Internship prep guides

Post on:

- LinkedIn
- Reddit
- Campus Discords

4 BRANDING DOCUMENT

4.1 Brand Personality

- Professional
- Modern
- Minimal
- Confident
- Practical

Not:

- Playful
- Corporate
- Flashy
- Overly “tech bro”

4.2 Brand Promise

We help students present themselves clearly and confidently.

4.3 Tone of Voice

Direct.

Clear.

No fluff.

No buzzwords.

Example:

Instead of:

"Elevate your digital identity."

Say:

"Share one link. Get hired."

4.4 Visual Identity

Logo:

- Simple wordmark
- Sans-serif
- Optional small symbol (arrow, launch icon)

Icon style:

- Thin stroke
- Rounded edges

No gradients.

No complex illustrations.

4.5 Brand Expansion Strategy

Phase 1:

Engineering students

Phase 2:

All university students

Phase 3:

Early career professionals

Never say “just for engineers” publicly.

If you want, next I can:

- Turn this into an execution roadmap with weekly milestones
- Or stress-test this idea brutally and show weaknesses
- Or help you define the actual MVP feature cutoff line

What do you want next?
